

Executive Order 2020-177: Declaration of state of emergency and state of disaster related to the COVID-19 pandemic

EXECUTIVE ORDER

No. 2020-177

Declaration of state of emergency and state of disaster related to the COVID-19 pandemic

Rescission of Executive Order 2020-165

Where Michigan was once among the states most heavily hit by COVID-19, our per-capita rate of new daily cases is now well below of the national average. Our progress in suppressing the disease, however, has eroded. Cases rose from a rolling seven-day average of about 25 cases per million per day in mid-June to about 60 cases per million per day through most of July and August. Moreover, many Michigan students have returned or will soon be returning to in-person instruction, increasing the risk of outbreaks. In an alarming trend, both nationwide and here in Michigan, younger people have constituted a growing share of new cases.

There is much we do not know about this novel virus, but we know at least three things for certain: it is widespread, it is easily transmitted by airborne particles, and its effects can be fatal. That lethal combination, combined with ongoing uncertainty about how to defeat it, means that the health, economic, and social harms of the COVID-19 pandemic remain severe and affect every corner of this state. The COVID-19 pandemic therefore constitutes a statewide emergency and disaster.

On March 10, 2020, I issued Executive Order 2020-4, which declared a state of emergency in Michigan to address the COVID-19 pandemic. This disease, caused by a novel coronavirus not previously identified in humans, can easily spread from person to person and can result in serious illness or death. There is currently no approved vaccine or antiviral treatment.

Once detected, the virus quickly spread across Michigan. As of April 1, 2020, the state had 9,334 confirmed cases of COVID-19 and 337 deaths from the disease, with many thousands more infected but not yet tested. Exactly one month later, this number had ballooned to 42,356 confirmed cases and 3,866 deaths from the disease—a tenfold increase in deaths. The virus's rapid spread threatened to overwhelm the state's health care system: hospitals in multiple counties were reportedly at or near capacity; medical personnel, supplies, and resources necessary to treat COVID-19 patients were in high demand but short supply; dormitories and a convention center were being converted to temporary field hospitals.

On April 1, 2020, in response to the widespread and severe health, economic, and social harms posed by the COVID-19 pandemic, I issued Executive Order 2020-33. This order expanded on Executive Order 2020-4 and declared both a state of emergency and a state of disaster across the state of Michigan. Like Executive Order 2020-4, this declaration was based on multiple independent authorities: section 1 of article 5 of the Michigan Constitution of 1963; the Emergency Management Act, 1976 PA 390, as amended, MCL 30.401 et seq.; and the Emergency Powers of the Governor Act of 1945, 1945 PA 302, as amended, MCL 10.31 et seq. On April 7, 2020, the Michigan legislature adopted a concurrent resolution to extend the states of emergency and disaster declared under the Emergency Management Act until April 30, 2020.

On April 30, 2020, finding that COVID-19 had created emergency and disaster conditions across the State of Michigan, I issued Executive Order 2020-67 to continue the emergency declaration under the Emergency Powers of the Governor Act, as well as Executive Order 2020-68 to issue new emergency and disaster declarations under the Emergency Management Act.

Those executive orders have been challenged in *Michigan House of Representatives and Michigan Senate v Whitmer*. On August 21, 2020, the Court of Appeals ruled that my declaration of a state of emergency, my extensions of the state of emergency, and my issuance of related executive orders clearly fell within the scope of the governor's authority under the Emergency Powers of the Governor Act.

Since I first declared an emergency in response to this pandemic, my administration has taken aggressive measures to fight the spread of COVID-19, prevent the rapid depletion of this state's critical health care resources, and avoid needless deaths. The best way to slow the spread of the virus is for people to stay home and keep their distance from others. To that end, and in keeping with the recommendations of public health experts, I issued orders restricting access to places of public accommodation and school buildings, limiting gatherings and travel, and requiring workers who are not necessary to sustain or protect life to remain at home. I also issued orders enhancing the operational capacity and efficiency of health care facilities and operations, allowing health care professionals to practice to the full extent of their training regardless of licensure, and facilitating the delivery of goods, supplies, equipment, and personnel that are needed to combat this pandemic. And I took steps to build the public health infrastructure in this state that is necessary to contain the spread of infection.

These statewide measures were effective. For example, a report released by the Imperial College COVID-19 Response Team showed that my actions significantly lowered the number of cases and deaths that would have occurred had the state done nothing. And while the virus remains aggressive and persistent—on September 2, Michigan reported a total of 103,710 confirmed cases and 6,509 deaths—the strain on our health care system has relented, even as our testing capacity has increased.

In early June, with the steep reduction in case counts, I moved progressively to relax restrictions on business activities and daily life. On June 1, I announced that most of the state would move to Phase 4 of my Safe Start plan, thereby allowing retailers and restaurants to resume operations. Hair salons and other personal care services followed two weeks later. And on June 10, I moved the Upper Peninsula and the region surrounding Traverse City to Phase 5, allowing for the reopening of movie theaters, gyms, bowling alleys, and other businesses.

Since then, however, our progress in suppressing the pandemic has stalled and begun to erode. Daily case counts in Michigan have exceeded 50 new cases per million statewide through most of July and August. Our statewide positivity rate has not decreased, remaining at about 3%. This reflects a national trend: COVID-19 cases are growing or holding steady in most other states.

Michigan continues to face an acute risk of a second wave, one that not only threatens lives but also our economy and the education of our children. In response, I have slowed the reopening of the economy. Performance venues remain closed across most of the state, and large gatherings remain curtailed. At the same time, consistent with the accumulating evidence that COVID-19 often spreads via aerosolized droplets, I have adopted additional measures—

including the closure of certain bars, and a requirement that stores refuse entry and service to those without face coverings—to reduce the risk of spread in indoor spaces. Life will not be back to normal for some time to come.

In the meantime, the economic toll continues to mount. Between March 15 and May 30, Michigan received 2.2 million initial unemployment claims—the fifth-highest nationally, amounting to more than a third of the Michigan workforce. During this crisis, Michigan has often processed more unemployment claims in a single day than in the most painful week of the Great Recession, and the state already saw its highest unemployment rate since the Great Depression (22.7% in April). The Michigan Department of Treasury projects that in the coming fiscal year, this pandemic will cost the state \$1 billion in revenue. Even as Michigan experiences unemployment rates not seen in decades, federal unemployment assistance has dwindled from \$600 per week to \$300. Without further action by Congress, even this limited federal assistance run out.

In addition to these challenges, many Michigan students will return to in-person instruction over the next month, increasing the risk of outbreaks. States that have reopened schools have already begun to see new cases—a second-grader in Cherokee County, Georgia, a middle schooler in Greenfield, Indiana, and a high schooler in Corinth, Mississippi, have already tested positive for COVID-19 after attending school in person, triggering quarantines in those districts.

The health, economic, and social harms of the COVID-19 pandemic thus remain widespread and severe, and they continue to constitute a statewide emergency and disaster. Though local health departments have some limited capacity to respond to cases as they arise within their jurisdictions, state emergency operations are necessary to bring this pandemic under control in Michigan and to build and maintain infrastructure to stop the spread of COVID-19, trace infections, and to quickly direct additional resources to hot-spots as they emerge. State assistance to bolster health care capacity and flexibility also has been, and will continue to be, critical to saving lives, protecting public health and safety, and averting catastrophe. Moreover, state disaster and emergency recovery efforts remain necessary not only to support Michiganders in need due to the economic effects of this pandemic, but also to ensure that the prospect of lost income does not impel workers who may be infected to report to work.

Statewide coordination of these efforts is crucial to creating a stable path to recovery. Until that recovery is underway, the economic and fiscal harms from this pandemic have been contained, and the threats posed by COVID-19 to life and the public health, safety, and welfare of this state have been neutralized, statewide disaster and emergency conditions will exist.

Acting under the Michigan Constitution of 1963 and Michigan law, I order the following:

1. The COVID-19 pandemic constitutes a disaster and emergency throughout the State of Michigan.
2. This order constitutes a state of emergency declaration under the Emergency Powers of the Governor Act of 1945. Subject to the ongoing litigation, and the possibility that current rulings may be overturned or otherwise altered on appeal, and to the extent the governor may declare a state of emergency and a state of disaster under the Emergency Management Act of 1976 when emergency and disaster conditions exist yet the legislature has not granted an extension request, this order constitutes a state of emergency and state of disaster declaration under that act.
3. This order is effective immediately and continues through October 1, 2020 at 11:59 pm. I will evaluate the continuing need for this order.
4. Executive Order 2020-165 is rescinded. All previous orders that rested on that order now rest on this order.

Given under my hand and the Great Seal of the State of Michigan.
